DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance: the claims have been amended to overcome rejections under 35 USC 112 and 103(a). A process for the treatment of polluted metal-mechanical industrial waste water, comprising treating the polluted water with about 400 to about 2000 grams of acid liquor having ferrous chloride and hydrochloric acid, per cubic meter of polluted water, forming a clarifying flocculus resulting from the precipitation of the ferrous ion, and absorbing protein with the clarifying flocculus, is not taught, disclosed or suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference to Miller (4,802,991; abstract; col. 1, lines 20-32; col. 3, lines 53-66) discloses a process for removing fatty acids from waste water comprising adding iron ions to form a clarifying flocculus that adsorbs fatty acids in the water. The reference to Van Der Spoel (6,251,277; col. 2, lines 17-54) discloses a process for removing proteins from water comprising adding iron chloride with pH adjustment to precipitate out the proteins.
